CELL ACTIVATOR

Our Candi Art Cell Activator has been specially formulated to create stunning lacing and cells in Acrylic Fluid Art.

The Candi Art Cell Activator is supplied in a convenient 20ml dropper bottle.

Add to your Candi Art Acrylic Paints (Standard or Metallic) – using a little (1 – 2 drops) creates small cells. Using more Candi Art Cell Activator, you can create many, many cells. You will discover the wonders that you can create. You can create larger and more cells by adding more Cell Activator drops to your pre-mixed acrylic paints. Remember that your cell formation maybe extreme and the oil will become visible on the surface of your acrylic pour.

Cells create fascinating pattern and effects in your Acrylic Pouring paintings. It is essential that you use the Candi Art Pouring Medium to effectively gain these cells. Remember to torch shortly after pouring to eliminate any air bubbles that have formed.

VISCOSITY:

Candi Art Pouring Medium together with Candi Art Cell Activator

Most cell forming additives have an oil base (usually silicone) to them in order to create these cells. The combination of the Candi Art Pouring Medium and the Candi Art Cell Activator brings together other chemistry to the mix. With the Candi Art Cell Activator, you can achieve unique cell effects that are unusual. The Candi Art Pouring Medium gives a durable, satin like finish. Candi Art Pouring Medium is easy to obtain the correct paint consistency when mixed with the Candi Art Acrylic Paints (Standard or Metallic).

The Candi Art Cell Activator can be used with other brands and types of Pouring Medium, but cell formation is not guaranteed, as Candi Art cannot test all Acrylic Paints that are available for craft projects.
