TOP COAT

The Candi Art Acrylic Top Coat / Varnish, is a UV Stabiliser Top Coat that can be used on most of your Acrylic Fluid Art projects.

SUITABLE FOR:

- A permanent protective Matt or Gloss Top Coat
- Protects Acrylic / PVA paints
- A sealant for porous cement type surfaces

APPLICATION

Apply a thin layer over your Acrylic Fluid art project and a second layer (if you wish), 24 hours after your first application. Candi Art recommends at least two layers of Top Coat.

- You can apply the Candi Art Top Coat with either a brush or roller to any of your art projects;
 - A brush will leave brush marks
 - You can reduce these by adding a little water to the Candi Art Top Coat prior to application
- If air bubble are noticeable, then lightly torch;
- Do not pour directly over your projects as this will create a thick layer and the product has been designed for thin applications
- If you have used the Candi Art Cell Activator then you need to clean the surface first before applying the Top Coat

TYPES OF CANDI ART TOP COATS

MATT

A Matt finish is used to reduce the inherent glare on your Acrylic Fluid artwork. Your Acrylic Fluid art project will have a dull appearance if you have used non-metallic paints. We therefore suggest a Gloss finish to give your artwork that high-gloss satin-sheen feel and look. The Candi Art Matt Top Coat can be used with all of the Candi Art Acrylic Paints (Standard and Metallic).

GLOSS

The Gloss finish will give your Acrylic Fluid artwork a high gloss sheen feel and look. The Candi Art Gloss Top Coat can be used with all of the Candi Art Acrylic Paints (Standard and Metallic)
